ADD MORE

create new capsule

→ post

- create new on button press
- send request
- add event / picture / description
- individual or all at once at list

want to get this working first
before implementing this

- has to be at creation of time
- ↓
- maybe add the feature later on to add later

id
user
name
start line
end time
description
list <entity>

← where entity, relationship, diagrams
& user stories
& process flowcharts
come into play

↑
id
link to picture
details
size

table / list view of capsule

- sort by: creation date
- unlock date
- alphabetical
- size

by creator] if you share a capsule with friends? share by link
↑ will maybe implement or email?
